## Comments to the Author:

1. In general, the paper is well written. I have a few comments:
2. There is no real attempt to define Impact of vaccination during the Covid-19 pandemic and heard effect.
3. Their review of the published literature is well-described. They offer a reasonable review of current scenario.
4. It could be more better if author define How Immunity is evolving with it, though they describes the immunity very well, however they are lacking to explain how the immune cells provoke the immunity in phase wise outbreak of SARS-CoV2 and their impact on community transmission.
5. Some grammatical errors and few sentences need to rephrase in section: How Host Immunity is Evolving with SARS-COV-2.
