Potential competing interests: No potential competing interests to declare.

Clarity: The structure of the paper could be improved to enhance the clarity of the presentation. Consider restructuring the manuscript to ensure a logical flow of ideas and to make it more accessible to readers.

Flow: Transition from one paragraph to another is not smooth.

Literature review: The literature review needs to be more comprehensive.

Language: The language of the paper could be improved.

Overall impact of the paper: The paper presents a promising concept, but the authors only wrote about the idea. The practical implementation should also be shown.
