Potential competing interests: No potential competing interests to declare.

1. In introduction section, the citation of references are written in inappropriate manner.
2. In the paper, a lot of typos and language mistakes are existing, they need to be checked and corrected.
3. In introduction section, author are talking about chapter 1 but no reference is provided for chapter 1.
4. The author should apply NIST test to check the randomness of the proposed key generation.
5. What is the advantage of using the used method over other methods in solving this problem?
