## Comments

### 1-Abstract

Authors should provide a brief discussion of results .

### 2- Results and discussion

#### 2.1. Results

Suggestions:

- statistical significance should be reported as  $p < 0.05$  and  $p < 0.01$  for 95% and 99% confidence intervals respectively, instead of giving the p values.

-When there is no statistical significance, authors should report as  $p > 0.05$

- Authors should indicate the table for coca consumption (table 5 probably)

#### 2.2 Discussion

- Paragraph 1

Authors should provide possible reasons for the low intake of beverages by respondents, supported by literature if available.
