Potential competing interests: No potential competing interests to declare.

General comment: Major revision

Comments to the authors: The authors described the status and trends of cruising tourism affected by the condition of the COVID-19 pandemic. Even though the topic is very current, the authors are advised to make some improvements and additions.

1. All figures need to be referenced in the text.
2. In Section 1, there is a lack of paper/research structure and literature review. There is no scientific approach or methodology. No connection with the last section.
3. In the whole paper, there are only facts and statistics and, generally speaking, no contribution to the literature.
4. Similar names of the sections. Please reconsider the modifications.

The paper shall be revised and adjusted. No scientific contribution. It should be reviewed again.
