# Anaplastic Kidney Wilms Tumor

National Cancer Institute

## Source

National Cancer Institute. *Anaplastic Kidney Wilms Tumor*. NCI Thesaurus. Code C6952.

Wilms tumor of the kidney characterized by the presence of nuclear anaplasia. Anaplasia is defined by the presence of all of the following: multipolar polyploid mitotic figures, marked nuclear enlargement, and hyperchromasia. When anaplasia is diffuse, it is associated with an unfavorable clinical outcome.
