

Review of: "The Choice of Breeding Objectives and Selection Criteria Decided by Breeders of Various Goat Breeds and Factors Influencing Them"

Albert Soudré

Potential competing interests: No potential competing interests to declare.

The study is very original, and the manuscript is very well written.

However, I think the title could be improved to make it more concise.

Figure 1 could be broken down for greater clarity so that the figures that will emerge from it are closer to the comments that go with each of them.

The manuscript may eventually be published with the above comments taken into account.
