**Potential competing interests:** No potential competing interests to declare.

This article covers a fascinating topic that deserves further study. However, there are a few areas where it could be improved:

- The abstract should clearly state the research objective and methodology.
- The introduction is engaging and well-argued; however, it is somewhat long and could be improved by synthesizing some repeated ideas.
- The methodology is weak, with only two case studies. More case studies are needed to produce more reliable results.

## **Specific suggestions:**

- In the abstract, add a sentence or two that states the research objective and methodology. For example: "This article investigates the impact of social media on voting behavior using a survey of 1000 voters."
- In the introduction, identify the most important points that you should make, and then focus on those points. Avoid repeating the same ideas multiple times.
- In the methodology section, explain why you chose to use two case studies and discuss the limitations of this approach. You could also add ways to improve the methodology in future studies.

I hope this feedback is helpful.
