Potential competing interests: No potential competing interests to declare.

In which country was the study conducted?

The aim of the study and the results are not mentioned correctly in the abstract.

The introduction is weak and not coherent, and its references are completely from Chinese studies. Do other parts of the world not have similar studies?

The introduction needs background analysis.

Name the laboratory standards.

Use valid references in the statistical methods section.

Why haven't you used the enrichment index?

Where is the source of pollution for each metal?

In the conclusion, why did you not mention the side effects of pollution?
