

# Review of: "[Mini Review] Role of Mango in Immune System"

Muhammad Abdul Rehman Rashid<sup>1</sup>

<sup>1</sup> Government College University, Faisalabad

**Potential competing interests:** No potential competing interests to declare.

The study reviewed the role of mango in immunity in humans.

**Strengths:**

It summarized the pharmaceutical importance of mango and briefly discussed the various metabolites with the relevant characteristics to boost immunity.

**Weaknesses:** However,

The study is too shallow.

It would be better to highlight the specific immunity mechanisms with figures for easy understanding.

It may also share the possible pathways to act for medicinal purposes. The specific secondary metabolites which may be candidates for drug designing may be indicated.

Furthermore, the introduction and conclusion sections seem to have originated from AI tools.
