Revitalizing Key Conditions and Integrated Watershed Management Approach to Sustain Water Availability and Agriculture in Semi-Arid Regions

1. It is better to present the definition of IWSM in the INTRODUCTION section to provide the same understanding to the readers.
2. It is better to present the quantity of annual precipitation, and the temporal distribution of precipitation, if the authors only present the aridity index, then not of the readers know how to calculate the index.
3. Figure 2 should be placed at the beginning of 4.1. First key condition: Assuring institutional, legal, and policy support. Improve Figure 2 by adding the goal of IWSM, add the constraint/problem and the associate solution/activities to solve every problem.
4. In the section of "Key conditions that need focus in the IWSM approach", it should be added a sub-sub title about communities' engagement. It suggests also to add about citizen science in the related research.
5. It should be added the existing condition of the institutions, policies, and regulations.
6. Please do not write a paragraph only consists of one sentence.
