Potential competing interests: No potential competing interests to declare.

This study provides a comprehensive exploration of the challenges and opportunities faced by small and medium-sized enterprises (SMEs) in the modern digital economy. This effectively highlights the critical areas that SMEs must master to thrive in this dynamic landscape.

A suggestion for improving the text is to add real-world examples or case studies that demonstrate how specific small and medium enterprises have successfully applied the concepts discussed. This would provide a clearer understanding of these principles and their practical implementation.
