Potential competing interests: No potential competing interests to declare.

The manuscript is quite informative but needs some minor revisions:

1. Which standards are used in antioxidant activity?
2. Kindly mention the positive and negative controls used in antibacterial activity.
3. The table should be prepared in a more concise way to be easily understood.
4. Kindly mention the yield of the aqueous and ethanol extracts.
5. The discussion part should be revised again with reference to previous literature.
