Potential competing interests: No potential competing interests to declare.

Thank you for the opportunity.

The manuscript is well structured with thorough methodology and statistical analysis.

Consider thorough proofreading and language editing to improve clarity. Check table 1 and 2 for errors and duplication. All abbreviations need to be defined. As mentioned in the title of the study kindly include findings on vitamin D3 in the abstract with respect to the title of the study. You could suggest specific directions for future research and how your findings might inform these studies.
