**Potential competing interests:** No potential competing interests to declare.

The introduction section is incomplete; please complete it if possible and provide more examples about UX in designing health app user perceptions and responses. The methodology is not presented in full in the abstract section of the intervention study. It is better to mention the type of study and how it was conducted for a better understanding of other authors. The discussion and conclusion sections should be mentioned in full. A comparison of the article with other related research should be made. The limitations of the study should be included.
