Potential competing interests: No potential competing interests to declare.

1. Line 1-4 in the abstract section is not necessary. It is better to remove these sentences from this section.
2. Various types of hybrid composites should be introduced in the abstract section.
3. The novelty of this work in the last paragraph of the introduction section is unclear. More explanations should be added to this section.
4. Why did the authors use NaOH treatment with these parameters? Proper references for this treatment should be added.
5. How many samples were tested for each mechanical test?
6. For improving the quality of this manuscript, the SEM analysis from the fracture surfaces of samples is necessary.
7. The manuscript can be reinforced by using the following documents:
 - a. <https://doi.org/10.1016/B978-0-323-91866-4.00006-8>
 - b. https://doi.org/10.1007/978-981-16-8360-2_7
