Yttrium Y 90 Monoclonal Antibody MN-14

National Cancer Institute

Source

National Cancer Institute. *Yttrium Y 90 Monoclonal Antibody MN-14*. NCI Thesaurus. Code C2249.

A radioimmunotherapeutic monoclonal antibody (MN-14) directed against tumor-associated carcinoembryonic antigen (CEA) and chelated to the radioisotope yttrium-90 (Y 90). Yttrium 90 monoclonal antibody MN-14 binds to tumor cell expressing CEA, delivering a cytotoxic dose of beta radiation. (NCI04)
