

Review of: "AI in Healthcare: The New Frontier of Inequalities"

Sannamallappa Anitha

Potential competing interests: No potential competing interests to declare.

This current paper gives only a generalized view of the existing techniques. There is no solution- or methodology-based research for solving any current issues in AI. Also, the research lacks case studies related to current problems. The paper can be revised accordingly with a certain depth of knowledge, narrowing down the area of interest. Relevant references to be added wherever required.
