Thank you for sending me the manuscript ID: 0VARS0 titled; "**Synthesis and Antibacterial Screening of Cefradine Schiff Bases and Their Metal Salts**" to review. I would like to inform you that the current manuscript showed weaknesses in the elucidation and characterization of the synthesized compounds, there is deficiency in the spectroscopic analyses. For example, mass and  $^{13}\text{C}$ -NMR must be included to confirm the structures of the synthesized compounds. Also there is lack in the  $^1\text{H}$  NMR discussion. On the other hand, in the experimental part, the names of the compounds must be added. Thus the current manuscript can be improved by the authors for resubmission to be suitable for publication.
