

# Review of: "The Instances of Insomnia among Adolescents in High School Addicted to Online Games"

Ila Linares

Potential competing interests: No potential competing interests to declare.

The article discusses an important topic, however, from a methodological point of view it has many weaknesses: 1. a established scale was not used to assess sleep issues, 2. it was not discussed that it could be a case of excessive sleepiness or sleep deprivation instead of insomnia, 3. no objective measure of sleep, such as actigraphy, was performed.
