Review Article titled:

Knowledge, Attitudes, and Practice (KAP) Study for Reducing Invalid Vaccine Doses in Routine Immunization: A Cross-Sectional Study in Urban Slums of Bangladesh

Comments:

- a. **Abstract:** Compact and very well written but key words should be minimum 5 and should be found via MeSh browser.
Invalid vaccine dose and cross sectional study not found in MeSh browser
- b. **Introduction:** well written and objectives are clear too
- c. **Methodology:** Insufficient, Questionnaire variables should be discussed either under methodology or data collection tool
- d. **Data analysis:** well written
- e. **Results:** well written but in table 6 why relationship of demographics with attitude is not included?

Wish you Best of Luck

Warm regards

Dr. Syeda Nadia Firdous
