

Review of: "A Perspective for Economic and Social Unfoldings of AI"

Don D.H. Shin¹

¹ Zayed University

Potential competing interests: No potential competing interests to declare.

Great work. The paper is well-written and nicely thought-out. Readers can be benefited from this article as it clearly addressed the socio-technical aspects of AI. The potential impacts of AI on social, political, and economic dimensions are nicely explicated. My only reservation comes from the reference that many recent and relevant works on AI have been missing from the literature. I strongly suggest you consider important works on AI.

The aforementioned work can be useful in building this study with its theoretical frame as these studies are mostly addressing user perspectives of AI. Please refer them to your work.
