Distal myopathy, Welander type

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Distal myopathy, Welander type. ORPHA:603*

Distal myopathy, Welander type (WDM) is a distal myopathy characterized by weakness in the distal upper extremities, usually finger and wrist extensors which later progresses to all hand muscles and distal lower extremity, primarily in toe and ankle extensors.
