Potential competing interests: No potential competing interests to declare.

This article has the potential to be published in the journal. The problem statement has many issues, and the researcher also already answers to solve the issues. Despite that, the methodology that he used was very good. Based on the research findings, the researcher already analyzed the data based on the research questions. The researcher also discusses the research findings quite satisfactorily. The finding is already supported by previous research. This research produced new findings to identify the factors that influence many leisure and rehabilitation activities.
