Potential competing interests: No potential competing interests to declare.

This is a very interesting piece of paper, very original and bringing a non-Western perspective to an interdisciplinary field. I would only recommend to question the use of the notion of "nature" or explain better what it means in this article. A further suggestion would be to give concrete examples of actions that amount to necro-politics in contrast with others that do not and the reasons behind it (perhaps in terms of possibilities of resistance).
