General comment

The work is interesting and well performed. The several aspects of the Work Ability Index are adequately investigated and discussed in their limits and potential. In some points, the presentation of work could be improved.

Specific comments

In the bar graphs Fig. 1 and Fig. 12, the indications on the x-axis must present the entire range.

Pag. 4-5: "...an unpublished study (see Athanasou, 2023a)." The study is listed as published! Why do you indicate it as unpublished? Clarify or rephrase the sentence.

Pag. 13, line 14: Do you introduce words of an author? What is "viz"? Rewrite the sentence more clearly.

All references reported in the references list must be included in the text. Check them and provide to insert the missing ones.
