Potential competing interests: No potential competing interests to declare.

Find here some comments to consider for a better version:

- 1.-For a better comprehension of future readers insert a conceptual model related to main proposal
2. Restructure the work by indicating at least the main contribution, what objective(s) have been achieved-.
3. In discussion section provide a broader view of how this approach can be used beyond the specific study.
4. Several references should be added (5 years later),.
