Dear Authors

You must note some of notes from my point of view:

1. The flowchart consists of three parts make it very good but you need to strong literature review and the development in your work that recognize previous studies.
2. You can care with stick to make it most efficient and practical to make it production line.
3. There are very small number of references, and there are huge studies about your topic, you can strength the literature review and increase the number of references.

Thank you and best wishes
