Clinical Trial Notification to Investigators of Safety Information Document

National Cancer Institute

Source

National Cancer Institute. *Clinical Trial Notification to Investigators of Safety Information Document*. NCI Thesaurus. Code C115663.

Records that describe the notification to investigators of all findings related to the safety of a clinical trial. This may contain important information on serious adverse events and/or safety concerns that could adversely affect the safety of subjects, impact the conduct of the trial, or alter the approval/favorable opinion of the institutional review board (IRB)/independent ethics committee (IEC) to continue the trial.
