Review of: "Adaptive Iterative Compression for High-Resolution Files: An Approach Focused on Preserving Visual Quality in Cinematic Workflows"

Vishal R. Satpute¹

1. Visvesvaraya National Institute of Technology, Nagpur, India

The work needs a more rigorous thought process to be looked upon. The literature review and the problem statement are not clearly explained in the manuscript. Currently, the references included are not sufficient. Additional references are required. The methodology presented in the manuscript needs more input with respect to the algorithmic flow and its explanation. The mathematical analysis with more detailed explanation is required. The results section needs to include more results to strengthen the work presented.
