

Review of: "Airbase Compatibility with Spatial Planning: A Case Study of Airbase Waterkloof (South Africa)"

John Christodoulakis

Potential competing interests: No potential competing interests to declare.

In my opinion, the following suggested changes will improve the paper.

In the introduction, give some details about the term "spatial footprint" because it is not clear what authors mean by this term.

Some references should be added in 3, where authors describe the different noise metrics used.

Add some details about the "National Key Point."

Authors' contribution is not clear and should be clarified.
