

Review of: "Breast Cancer Subtypes And Prognosis: Answers To Subgroup Classification Questions, Identifying The Worst Subgroup In Our Single-Center Series"

E. Elif Ozkan

Potential competing interests: The author(s) declared that no potential competing interests exist.

- 1- The manuscript needs to be edited by a native speaker
- 2- The recording and archive system may be explained in a detailed way in terms of breast feeding, menarche or menopause history and LHRH usage
- 3- The subtype and branches in table 1 is somehow complicated. Authors may design it in a more clear way.
