Potential competing interests: No potential competing interests to declare.

The challenges and prospects for Aerosol-Cloud-Precipitation Studies have been discussed in the manuscript. I think this is a short discussion paper and not an original work. I have listed my major concerns below:

The novelty of the manuscript has not been justified properly.

The authors have introduced two Challenges for Aerosol-Cloud-Precipitation Studies and discussed prospects for advancing aerosol-cloud precipitation research. Can you provide specific examples of additional challenges and prospects that should be addressed in the manuscript?

Only one figure out of the four figures in the manuscript is original!
