The topic "Mobile Phone Recycling and Stockpiling Behaviour in the UAE: A Gender and Age Study" is an important area of research that speaks to our collective existence and is a key aspect of SDGs. What commendable research! These discarded and seemingly useless mobile devices in our landfills contain various toxic and hazardous materials, such as lead, mercury, cadmium, and brominated flame retardants. These materials can leach into soil and water, polluting ecosystems. Dr. Lukman Raimi, Universiti Brunei Darussalam
