The study titled "Nigerian Youths' Perception of Privacy and their Self-Disclosure on Social Media," conducted by Oluwakemi E. Akerele-Popoola, Adesina Lukuman Azeez, and Abiodun Adeniyi, is a thorough investigation that examines the complex connection between privacy perceptions and self-disclosure behaviours among Nigerian youths on social media platforms. The study is meticulously organised and based on pertinent ideas, including Social Penetration and Privacy Calculus theory, which establishes a strong and comprehensive theoretical foundation for the investigation.

The introduction aptly establishes the context for the research by addressing the privacy dilemma and emphasising the importance of comprehending the online behaviours of young individuals. The literature review is comprehensive and offers a strong foundation for the study, examining multiple facets of privacy, self-disclosure, and the determinants that impact these behaviours. The authors have effectively included a diverse array of scholarly works to substantiate their inquiry.

The methodology part is lucid and comprehensive, elucidating the mixed-methods approach encompassing both quantitative and qualitative studies. Selecting undergraduate students from two higher institutions in Kwara State as the study population is a suitable and targeted approach for the research.

The findings portion is effectively organised, featuring tables and descriptive statistics that succinctly illustrate the youngsters' perspectives on privacy and their apprehensions. Conducting a content analysis of Facebook postings enhances the quantitative survey findings by providing concrete instances of how privacy attitudes are demonstrated in real online actions. The discourse surrounding the privacy paradox and how young individuals navigate their worries regarding privacy and the desire to reveal personal information is notably enlightening.

Nevertheless, the article would be enhanced by a more discerning examination of the findings, specifically addressing potential constraints of the study and their potential impact on the interpretation of the results. Although the conclusion effectively summarises the findings and their implications, it would benefit from providing more precise recommendations for policy or practice that are derived from the research outputs.

The essay exhibits a generally well-organized structure, although there are several spots where the flow may be enhanced to improve reading. Dividing the literature study into several sub-sections accompanied by explicit headers would enhance its comprehensibility. In addition, maintaining a uniform and lucid formatting style for tables and figures

would improve the overall visual appeal of the piece.

In summary, the article provides a significant contribution to the comprehension of privacy and self-disclosure patterns among Nigerian teenagers on social media. It emphasises the intricate characteristics of these actions and the necessity for more sophisticated methods to tackle privacy issues in the era of digital technology. If this article undergoes slight modifications to enhance its clarity and analytical depth, it has the potential to become a valuable resource for scholars, policymakers, and practitioners who are interested in studying privacy and social media behaviours.
