

# Review of: "A Study from the Perspective of Chinese Traditional Culture, Social Medicine, and the Healthy China Strategy: The Imperative Revival of Chinese Shoulder-Carrying Culture - A Solution to China's Dilemma of Aging Load-Bearing Laborers"

Ting Gui

Potential competing interests: No potential competing interests to declare.

I found the paper to be overall well written. It is also interesting for us to know the social and cultural factors behind the dilemma of aging load-bearing laborers. Clearly, the author has done a great job in understanding the Chinese shoulder-carrying culture as well as its medical influences.

But it is better to make this article shorter and more focused so that people from different academic fields could quickly identify the key points of your findings.
