Review of: "Herbal Treatments and Their Impact on Male Fertility: A Comprehensive Review"

Ilaria Listorti¹

1. Independent researcher

General Observations

The article is well-structured and covers a wide range of relevant topics concerning male fertility and herbal treatments. The language is appropriate; however, there are some areas that could be made clearer.

The introduction is well-written and provides a clear context. You might add a final sentence that clearly states the objective of the article.

The description of the methodology and the results section are both detailed and clear.

The discussion is comprehensive and offers a good analysis of the results. You might want to emphasize the practical implications of your findings more.

The conclusion effectively summarizes the main points, but it could be helpful to suggest some directions for future research.

Minor Errors

Ensure all abbreviations are explained the first time they are used.
