

Review of: "How Urban Heat Islands Effect Crime: Understanding the Implications of Temperature, Population Density, and Green Canopy Cover in Shaping Built Environments"

Teodoro Georgiadis¹

¹ Italian National Research Council

Potential competing interests: No potential competing interests to declare.

With the new version I remain in my opinion that this is an interesting work. Given the complexity of this issue it is clear that many paths can be choose to provide explanation. Here the authors have clearly described some relationships capable to give an interesting insight to the problem.
