

# Review of: "[Perspective] Hypochlorous Acid (HOCL): A Multifaceted and Promising Therapeutic Perspective Against Human Immunodeficiency Virus (HIV)"

Syed Ashraf

Potential competing interests: No potential competing interests to declare.

## For Author,

1. Page 2/10- Last Para: Upper 2 lines-" Hypovhlorous acid is -----bacteria, virus, fungi" - Please provide reference
2. Page 3/10-First and second line - Please provide reference
3. Page 5/10- "Chronic immune activation" be replaced by "Chronic immune deactivation"
4. Guidance on dosing: As high a dose as 75 mg per kg is too hypothetical. It should be replaced by more rational dose like the one derived on pharmacological and initial experimental considerations.

## For Editor

The article is topical and clearly explains the disruptive role of HIV Virus with regard to human immune system and the positive role of endogenous HOCl for the management of HIV patients. It may enhance the awareness of HOCl treatment protocol , taken into account of the full pharmokinetic implication.
