**Potential competing interests:** No potential competing interests to declare.

Could you provide more recent citations to ensure the information presented is updated, considering the rapidly evolving nature of healthcare and antibiotic resistance? Incorporating recent studies will enhance the credibility and relevance of your review.

The article briefly mentions the potential use of antifungals or antivirals for non-bacterial infections. Could you elaborate on current research or practical implications of these alternatives?

The article mentions risk factors such as poor oral hygiene and diet. However, it lacks a detailed exploration of the socioeconomic factors contributing to the prevalence of dental infections. Could you delve deeper into these aspects to provide a more comprehensive understanding of the issue?

While prevention and treatment are briefly mentioned, the article could benefit from a more detailed discussion on preventive measures. How might public health campaigns, education, and community-based initiatives contribute to addressing dental infections and antibiotic resistance on a global scale?

The article highlights the need for patient education on the proper use of antibiotics. Could you provide more specific recommendations on how dental healthcare providers can effectively educate patients to minimize antibiotic misuse and overuse?

How might incorporating patient perspectives and experiences with dental infections and antibiotic treatment enhance the discussion? Including real-world insights could contribute to a more holistic understanding of the issue.

Considering the multifaceted nature of healthcare issues, could you discuss the potential benefits of incorporating multidisciplinary approaches in addressing dental infections and antibiotic resistance? This could involve collaboration between dental professionals, public health experts, and policymakers.

In addressing the global impact of dental infections and antibiotic resistance, are there specific strategies or initiatives that you would recommend for fostering international collaboration and information sharing among healthcare professionals and researchers?
