Dear author, your work is good, but I suggest some points for improving the article as follows:

I suggest adding a table including the names and acronyms of all techniques used in the article.

I suggest including additional metrics, especially the ROC curve and AUC, for all techniques that are used to provide more details of their performance.

I suggest adding more modern publications and making a table for comparison with the rest of the related work, which makes the article more important and interesting.

I suggest adding a table that includes the advantages and disadvantages of each technique that is used in the article.

I suggest introducing more details about the data preprocessing steps that were used.

It appears to be a good article; I suggest accepting and publishing it.
