

Review of: "Neutronic Chain Reactions for Polonium-210 Production"

Adedamola D. Aladese

Potential competing interests: No potential competing interests to declare.

The paper is well-written and organized. The aims and scopes were addressed in a detailed manner. The authors presented the background story and support its findings with experimental data, which are well-explained.

Minor comment:

For easy reading, author can change "3" to three in section 2, line 4.
