

Review of: "Comparing YOLOv8 and Mask RCNN for object segmentation in complex orchard environments"

Kannadhasan Suriyan

Potential competing interests: No potential competing interests to declare.

The authors should clearly mention the challenges in the abstract. Mention a few recent techniques and highlight what the challenges faced by the systems are, and then present the proposed objective. Objectives and challenges are quite different from each other. Improve the figure quality.

Add some comparison results and discussion.

Give a comparison with previous work.

Check for grammar and spelling.

The literature review part is required to be improved.

The Results and Discussion part is required to be improved.

State the novelty of your work.

Authors should cite the figures and tables in your paper content.

Authors' research should follow the recent year and also compare the results with recent articles.

A greater number of references should be added to your article.
