This manuscript provides a thorough and well-researched exploration of the etiology and pathophysiology of T1DM. The authors present an extensive review of current knowledge, offering valuable insights into the underlying mechanisms and contributing factors of the disease. The paper is well-organized and offers a comprehensive synthesis of both genetic and environmental influences on T1DM. Overall, this work makes a significant contribution to the existing body of literature and will serve as a valuable resource for researchers and clinicians in the field. I recommend this paper for publication.
