Potential competing interests: No potential competing interests to declare.

- 1- The title is not reflected in the manuscript exactly.
- 2- The abstract does not contain the results about the effect of Al for other studies.
- 3- More paragraphs are without references.
- 4- The discussion is not written accurately, particularly about the treatment for excessive Al in soil.
- 5- Figures 1 and 2 are not mentioned in the text.
- 6- The remediation is not mentioned as a treatment for this problem.
- 7- The nanoparticles are not mentioned as a method for treatment of this problem.
- 8- Using 25 references does not cover the review articles, and using more references is important.
