

Review of: "The neuropsychological effects of some childhood neurodevelopmental disorders"

Sagarika Majhi¹

¹ Dr. A.P.J. Abdul Kalam Technical University

Potential competing interests: No potential competing interests to declare.

1. Add diagrams to elaborate different neurodevelopmental disorders.
2. A table can be prepared listing the disorder along with symptoms, cause and neuropsychological effects at one place together.
3. The review is quite small. It can be extended by quoting clinical examples along with the disorder.
4. For various neurodevelopmental disorders, which part of brain is linked or associated must be mentioned.
5. If possible, add a topic of pharmacotherapeutic interventions for various neurodevelopmental disorders.
