Potential competing interests: No potential competing interests to declare.

Please show the samples (male and female) of students. It is better to use more up-to-date references (e.g., 2022, 2023)! It is better to have clearer tables about the findings (e.g., male and female, age, grade, major). I think for the motivational aspect, there are many factors such as educational background, family values, job opportunities, personal abilities, and so on. In the discussion and conclusion, there should be more analysis from the researcher's point of view, which carried on this study!!
