Review of: "A Security Framework for the Mobile Application Using Color Barcode"

Kai Gao

1. The structure of the paper is not complete. The effectiveness and accuracy of this method may need further verification through practical experiments and applications. Thus, the authors need to add an experimental section.

2. More detailed explanations and clarifications are needed for certain specific steps.

3. Comparisons with other methods are needed.

4. A quantitative description of the contribution may be helpful. The authors should provide a clear and concise discussion of the implications of the results.
