GSK-Binding Domain

National Cancer Institute

Source

National Cancer Institute. *GSK-Binding Domain*. NCI Thesaurus. Code C14104.

The GSK-Binding Domain of AXIN2 mediates interaction with GSK3-Beta. Involved in regulation of the WNT signaling pathway, AXIN2 organizes an APC/Beta-Catenin/GSK3-Beta/ AXIN2 complex that leads to Beta-Catenin degradation. (NCI)
