Potential competing interests: No potential competing interests to declare.

1. In the introduction, bioactive compounds present in V. domain are missing, specifically related to leaves, fruits, stem, etc.
2. In methodology, there is a spelling error in Sahli's hemoglobinometer.
3. Grammatical errors in some sentences, like "uric acid used the method of Carroll et al."
4. In methodology, LD50 is written as LSD.
5. Repetition of CAT value.
6. The number of groups is not specific, as it is mentioned as 6 and 7 at different places.
